### PROFILE

I am a Junior Full Stack Web Developer, based in London - UK. I am passionate about Technology, development and brands that work to contribute to a better digital interaction. I work and believe in actions that can have a positive impact on people's lives.

I have been studying at Trybe, a web development school, since May/2021.

I love computer games, boardgames, middle-earth, and cyberpunk. I also like going to a pub and having a pint with a good conversation.

### EDUCATION

#### Fullstack Developer

Trybe

04/2021 – present | Online

I've already learned: Git, GitHub, HTML, CSS, JavaScript(ES6, HOFs, Fetch API, async/await), Unit Tests/Jest, React(Life Cycle, CRUD, RTL, Redux, Context API, React Hooks), Agile Methodologies (Scrum, Kanban), Docker, SQL(MySql).

I'm currently learning: Node.js, TypeScript, MongoDB, Python.

#### Network Installation and Maintenance | Technician

Senac Brasil

07/2007 – 2007 | Vitoria, Brazil

Implements and maintains an infrastructure, access equipment, operating systems and computer network services.

#### Assembly and Maintenance of Computers | Technician

Senac Brasil

01/2007 – 2007 | Vitoria, Brazil

Configure computer components, verifying hardware operation, assemble and disassemble computers, install operating system, fundamentals of computer architecture, hardware components.

### LANGUAGES

- English
- Portuguese

### PROJECTS

#### Recipes App

Trybe / Group Project

What I've learned:

- Working in teams using Kanban/Scrum effectively;
- Use Redux to manage state;
- Using the React-Redux library;
- Use the React Context API to manage state;
- Use React Hook useState;
- Using React Hook useContext;
- Using React Hook useEffect;
- Create custom hooks;

Link: <https://recipes-app-project.vercel.app/>

#### Starwars Planets Search (Hooks)

Trybe / Group Project

What I've learned:

- Use a React Context API to manage state;
- Use React Hook useState;
- Use React Hook useContext;
- Use React Hook useEffect;
- Create custom React Hooks.

Link: <https://starwars-hooks-project.vercel.app/>

#### Wallet Project

Trybe / Individual Project

What I've learned:

- Create a Redux store in React applications;
- Create reducers in Redux in React applications;
- Create actions in Redux in React applications;
- Create dispatchers in Redux in React applications;
- Connect Redux to React components;
- Create asynchronous actions in your React application that uses Redux.

Link: <https://wallet-project.vercel.app/>

#### RTL-Pokédex (React Testing Library)

Trybe / Individual Project

What I've learned:

- Use selectors (queries) from React-Testing-Library in automated tests;
- Simulate events with React-Testing-Library in automated tests;
- Test asynchronous logical flows with React-Testing-Library;
- Write tests that allow refactoring the structure of application components without needing to change them;
- Create API mocks using fetch;
- Test inputs.
