Andre Lorenzoni Pereira

26th January, 2022

I'm a great match for this role because I'm studying all the hard skills desired by the company since April 2021. From HTML, through Javascript(ES6, HOFs), CSS(Bootstrap, Sass), React(CRUD, Redux, Hooks), to SQL(MySQL).

I'm also familiar with Git, GitHub, Docker. In addition to also knowing Jest (Unit Tests, RTL). Now I'm studying Node.js.

In terms of soft skills, since I started studying at Trybe, I learned to put into practice Agile Methodologies (Scrum, Kanban) in addition to improving my communication, empathy, and my ability to learn and teach.

I am searching for my first job as a developer. I need a place where I can learn as much as possible from my co-workers, I can practice all that I have learned, and add as much as possible to the team.

I applied for this position to achieve this goal by joining your team!

Sincerely,
